Time for **work!**

Infrastructure projects begin

Project schedule

A *tentative* schedule will be posted on our website once it becomes available. Depending on weather, contractor progress and other factors, these dates **will be updated** throughout the course of the project.

Driveway access and parking

Depending on the scope of work, driveway access will be limited at times. Please see the enclosed supplement for more information.

For your convenience, the Police Department will lift some parking restrictions adjacent to project locations and increase patrol activity. Parking will be allowed on both sides of adjacent streets, but it is still prohibited to park within 20 feet of a crosswalk, 15 feet of a fire hydrant, or against the flow of traffic.

Homeowner property in Village right-of-way

The Village right-of-way, which is generally defined as the area from the street to the sidewalk, is to be kept free of homeowner property.

Items such as **sprinkler systems, electric dog fences, brick pavers, coach lights, custom mailboxes, flower boxes, special landscape features, etc.**, may interfere with proposed work.

The Village is **NOT** responsible for such property within the right-of-way or parkway. If you have any of these items located in the Village right-of-way, please contact the Engineering Division prior to the start of work on your street.

**ROAD
CONSTRUCTION
AHEAD**

Project plans, tentative start dates, status updates, and any changes to anticipated schedules are posted weekly at vohe.org/construction. You can also find updates for other area road construction projects on our website. Scan the QR code to go directly to the website.

SCAN ME

Garbage pickup

Garbage pickup will occur on your regularly scheduled day; however, pickup times may vary based on construction activities scheduled on your street. To ensure pickup, please have the garbage set out by 6 a.m. on the regularly scheduled day.

Mail delivery

Mail delivery will continue during the project. On some streets, mailboxes next to the curb will be removed during construction. Cluster mailboxes will be set up at the end of the block for mail delivery in these situations. On most streets, mail delivery will occur as normal.

Parkway landscape restoration

Restoration of the disturbed parkways will occur after completion of the improvements.

All areas will be backfilled with topsoil for safety shortly after the completion of roadway work. Due to high summer temperatures, **most** final landscape restoration work will not begin until mid-September.

At the completion of the project, Village engineers will assemble a list of items that were not satisfactorily completed by the contractor, which will include improper restoration. Please be assured that, if there are deficiencies, Village engineers will be working with the contractor to correct them.

Additional project-related questions?

Do not hesitate to contact the Engineering Division if you have additional questions related to police, fire and ambulance access, school bus access, handicap accessibility, special events, garage sales, block parties, moving or remodeling, etc.

To sign up for weekly project related updates, send an email to construction@vohe.org. You may also sign up by calling the Engineering Division at 847-252-5800. We strongly encourage all residents to sign up for weekly email updates, as the project schedule will change throughout the course of the project.
